Dear all,

according to the procedure specified in Article 32 (3) of Directive (EU) 2018/1972 of the European Parliament and of the Council of 11 December 2018 establishing the European Electronic Communications Code, Article 18 of the Telecommunications Act of 16 July 2004 (Official Journal form 2024 item 34 with changes, hereinafter referred to as „the Telecommunications Act”), **the President of the Office of Electronic Communications** (President of UKE) shall notify the European Commission, the Body of European Regulators for Electronic Communications (BEREC) and the National Regulatory Authorities in other Member States of the European Union a draft decision regarding:

draft reference offer based on fiber technology in the scope of providing access to wholesale local access at a fixed location and wholesale central access at a fixed location.

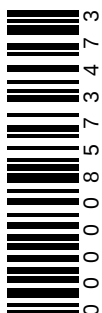

The Decision of the President of UKE, currently presented for the notification, partially maintains the decision from the 26th of June 2022 (presented for notification in February 2022 and accepted by the European Commission) and partially amends the above-mentioned notification. The amendment concerns supplementing the reference offer with colocation services and accompanying services. In addition, fees have been updated due to the change in the financial year. The basis for determining the fees were justified costs (Article 39 of the Telecommunications Act), which are consistent with the Long Run Incremental Cost (LRIC+) methodology, and were verified by an independent auditor in accordance with Article 53 section 5 of the Telecommunications Act and received a positive opinion.

The summary of a draft decision is included in the attached **Standard notification form**.
